

# SmartLife

## SmartLife Product Summary

### A new formula to increase brain power

People have a strong need for peak mental performance, as the workplace becomes more knowledge based and fast-paced, and as life expectancy is extended. As regards the learning and memory ability of children, many in Asia look to dietary supplements to help their children compete in school and maximize their learning skills.

PGL International introduces Paigeland SmartLife – a new and advanced dietary supplement for improving memory, concentration, and mental acuity.

### Boost your brain power!

- ◆ SmartLife improves memory and mental sharpness. Extensive testing shows no side effects.
- ◆ Impressive results after 6-8 weeks in double blind clinical tests. Internationally recognized mental ability testing showed 20% increase in Memory Quotient and Intelligence Quotient scores.
- ◆ Unique formulation of the peptide MEP which is a natural by-product of body's digestion of yeast proteins contained in breads and baked goods.
- ◆ Scientifically, MEP is structurally related to natural brain peptides, and enhances the function of the hippocampus area, the learning center of the brain.

### SmartLife has the following properties:

- ◆ The active ingredient of SmartLife is MEP (Memory Enhancing Peptide). MEP is one of the most outstanding inventions from the Chinese Academy of Sciences, protected by USA, British and China Patents. It is a yeast metabolite produced inside the body as a natural by-product of the body's digestion of yeast proteins contained in breads and baked goods.
- ◆ Encapsulated and formulated for optimal MEP activity.
- ◆ Brings about marked improvements in learning and memory in children, adults and the aged. Extensive testing has demonstrated the lack of side effects.
